Trimble Solutions- design-build-operate (DBO) lifecycle

BIM Software for free flow of information, constructible models and collaboration

Trimble.

Model based process enhances collaboration and enables efficient creation and transfer of information

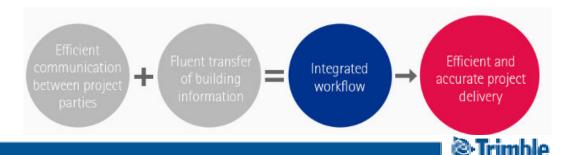

openBIM

- openBIM means that BIM operations and BIM data is not tied to any specific tool, software or vendor.
 - Freedom to choose the tools best suited for the purpose
 - Freedom to transfer data between tools
 - Freedom to develop very purpose specific tools independent of any platform
- Open standard data formats
 - IFC, Industry Foundation Classes is most commonly used standard for communication

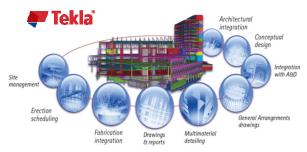

Trimble's software solutions for structures

Creation and management of 3D structural models

- Accurate, constructible models with high level of detail and information
- Not restricted by material / structural complexity
- From conceptual design to detailing, fabrication, erection and construction management

Trimble Connect

Construction platform, coordination & collaboration

- Combine and review models
- Check for conflicts
- Communicate and share
- Information available anywhere at anytime

Analyze and design buildings

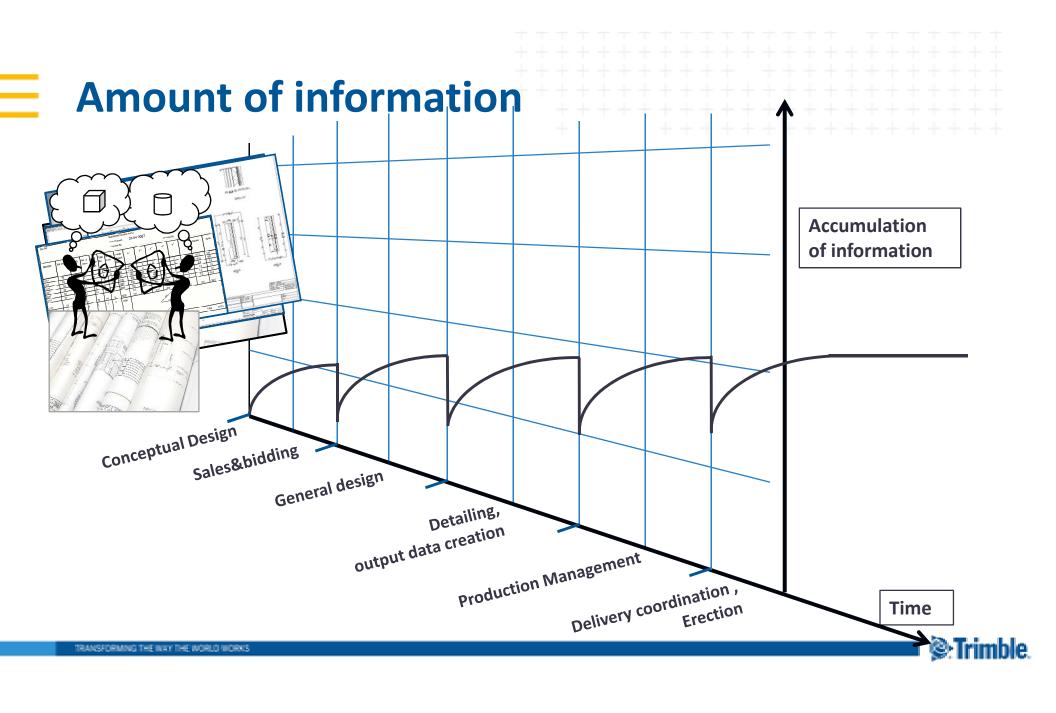

- Analyze and design buildings
- Optimized concrete and steel design
- Modeling, load analysis, design, documentation
- Tedds to automate repetitive structural calculations

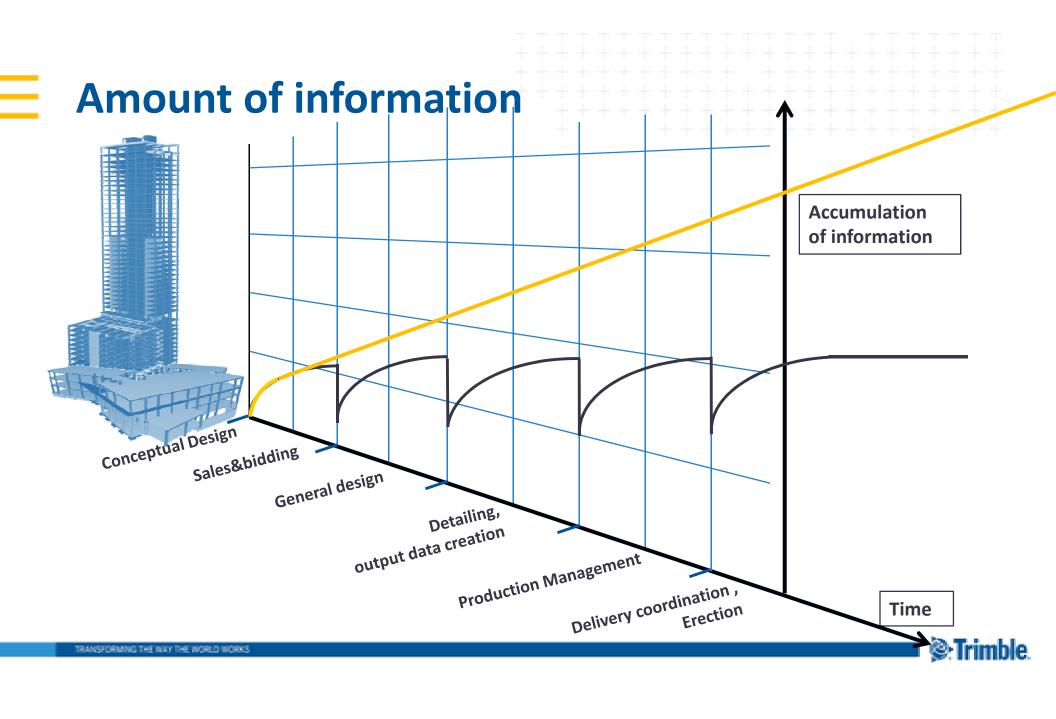

The Trimble Difference Plates, Bolts & Welds Embeds Reinforcement Formwork Constructible **Conceptual** Bolts Lay-Out Points

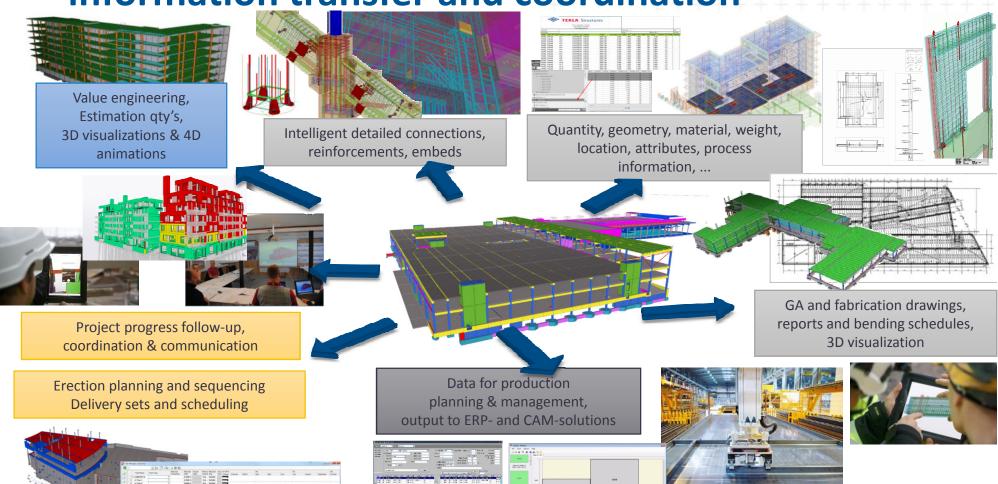

Model-based manufacturing process helps to streamline and optimize whole value chain

TRANSFORMING THE WAY THE WORLD WORKS

Trimble.

Model-based working supports users through the fabrication process

Design & detailing, Documents and data for production and site

Integrate production (CAD-CAM), Data for production management (ERP), planning & coordination

Data for storage management, Delivery coordination

MODEL

Estimator, Sales manager

Detailer, Drafter

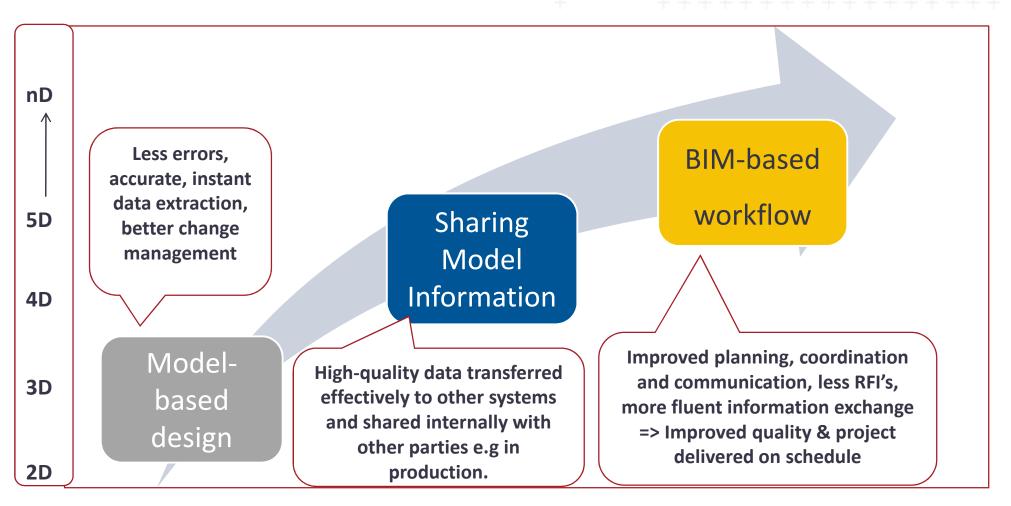

Production Planner,
Purchaser
Delivery coordinator

Installation manager/
- coordinator

Towards BIM-based workflow

Tekla Structure software provides solutions for

Concrete Contractors

General Contractors

Rebar Fabricators

Offshore

EPC

Steel Fabricators

Precast Fabricators

Structural Engineers

Requirements in Precast Projects

- Numbering Similar Elements
 - Shop/Form drawings
 - Mould Allotment
 - Embeds and other utility services
 - Cutting Lists for Slabs
- Stacking , Lifting & Transportation
 - Lifting Based on Element types
 - Lotting
- Erection
 - Tracking Element Status
 - Dependency of elements / Erection sequencing

TeklaStructures For Pre-Engineered Buildings

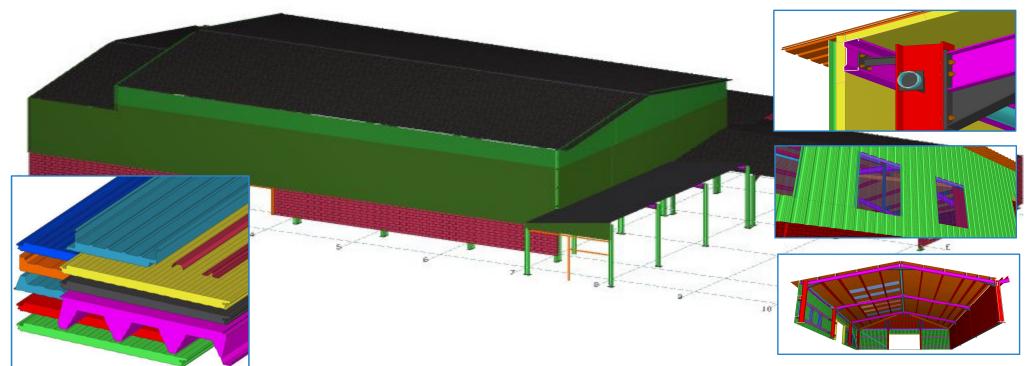

Tekla Structures PEMB modelling Cladding

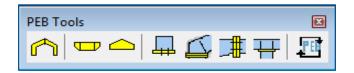

Suite of cladding tools and profiles, all customisable

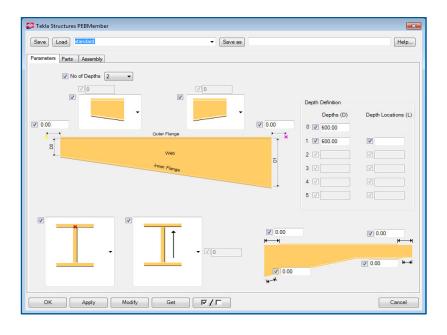

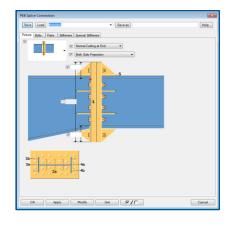

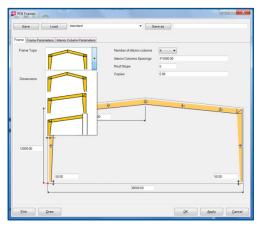

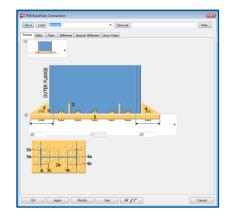

Tekla Structures PEB component library

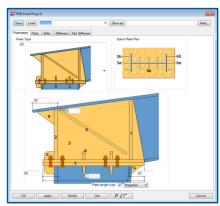

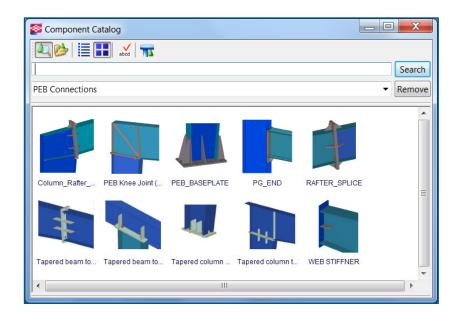

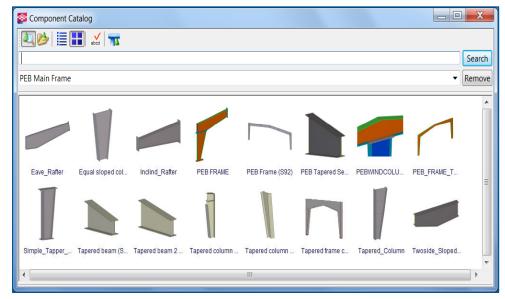

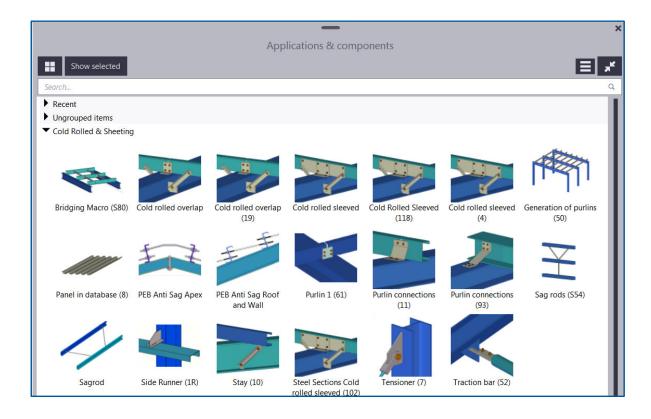

Build your own Connections..without programming !!!!

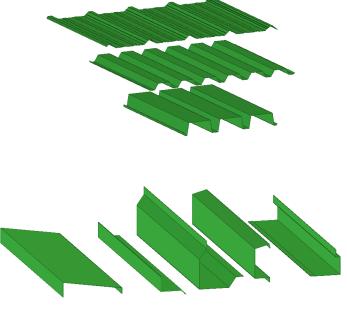

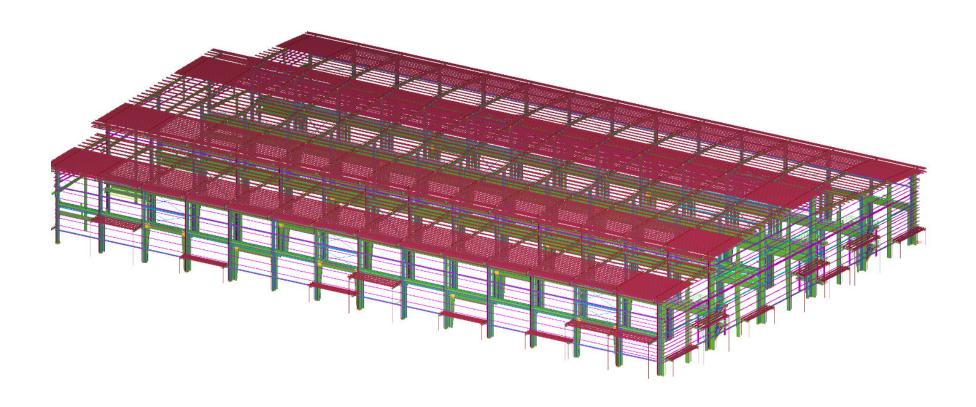

Tool Box for Cold rolled & Sheeting

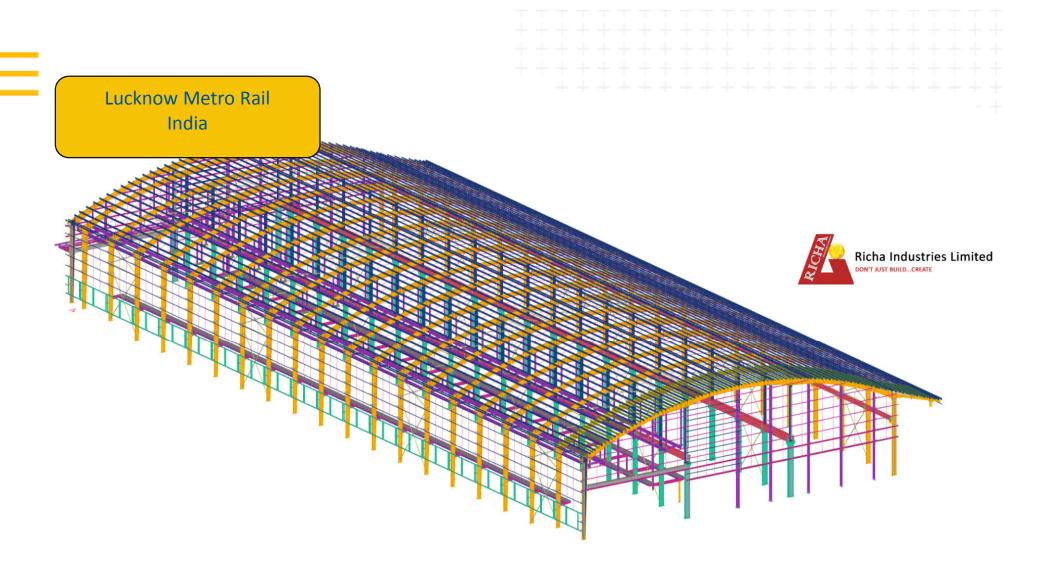

Tata BlueScope Building Solutions

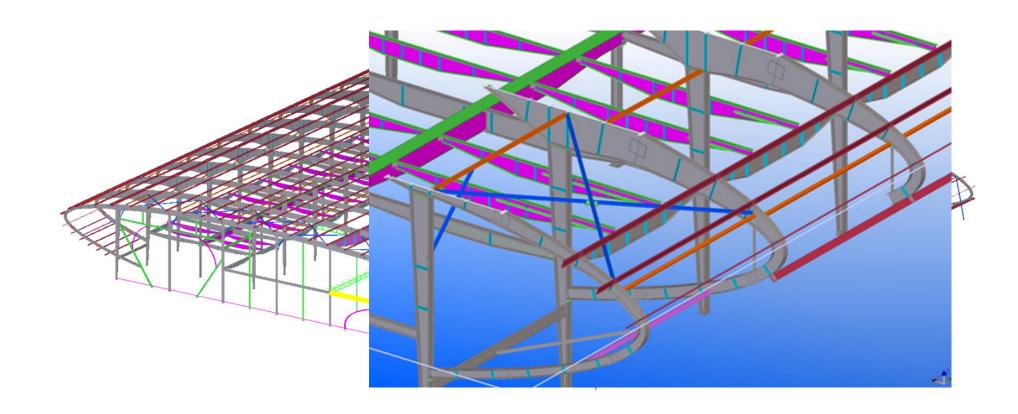

Reva Car Showroom – Curved PEB Frame

Our PEB Customers...

With Tekla you can

- Reduce waste and total cost
- Estimate accurately and manage risk when bidding
- Avoid detailing and fabrication errors and minimize the need for rework
- Link with production machinery, transfer information efficiently and avoid human errors
- Enhance communication and coordination using the model
