# INTRODUCTION

A National Level Conference Cum Exhibition called PEPSCON 2018 ("Pre-Engineered and Pre Cast Concrete Structures") is being held at The Institution of Engineers (India), Telangana State Centre, Khairatabad, Hyderabad, India on 22<sup>nd</sup>, October 2018 on behalf of Pre Engineered Structures Society of India, Hyderabad and Indian Buildings Congress (IBC).

PEPSCON Conferenced was held sofar since 2013 at Hyderabad, Vijayawada and New Delhi Each of the conferences was attended by about 300 DELEGATES and the response was resounding.

The conference presented the information about:

- 1) Pre Engineered (Structural Steel for Buildings)
- 2) Precast Buildings (Precast Concrete) and
- 3) Other techniques like shortcreting wall with insulation.

The conferences gave a good insight about the precast and other technologies used for construction to the Builders and Developers in India. The total urban housing need of India is expected to increase to 44-48 million units by 2022.

The emerging technologies are the best suited system of construction to meet the objective of housing for all by 2022, deviating from conventional construction, to achieve faster construction and durability.

The technologies presently used for housing for all scheme are as follows, viz.,

1. Conventinal RCC Frame Construction.
2. Monolithic RCC Construction using Aluminium Formwork.
3. Tunnel Formwork.
4. Precast Concrete Construction.
5. Composite Construction.

Information about the precast ongoing construction and the challenges faced there will be presented and debated in this conference with regard to its adoptability, time saving and cost effectiveness.

## ABOUT INDIAN BUILDINGS CONGRESS

Indian Buildings Congress (IBC) was founded on 1st September 1992, when a Founders' Meet was organised in New Delhi with the initiative of the then Director General (Works), CPWD, Shri O. P. Goel. About 250 professionals attended this meet. IBC was registered as a Society under the Societies Registration Act 1860, in New Delhi, on 29th March 1993. IBC has more than 123 Institutional Members, 5100 Individual Members and 151 Student Members as present. The wide spectrum of membership gives it a unique place in the entire gamut of building engineering discipline and construction industry.

# OBJECTIVES

The Delegates for this conference will be from various organizations, viz.,

Members of Organisations like SEWC, ACCE(I), CREDAI, BAI, IAStruct(E), IIA, ICI, etc., and from Academic institutes like IIIT, SERC, JNTU, IIT, other Engg. Institutions and Government Organisations like R&B, P.R Department, MES, CPWD, Public Undertakings, and Private Companies like L&T, SPC, TATA Housing, etc., are going to assemble and brainstorm and bring about process and systems for acceptance by end user for better quality, Quick and cost effective Solutions.

Who Should Participate	Take Aways
<b>Academicians</b>	For knowledge assimilation, dissemination, interaction & status review
<b>Consultants</b>	Gain Insights into precast/prefab technologies and meet potential consultants
<b>Designers / Architects</b>	To know recent trends in Design, materials, and their application
<b>Builders</b>	To understand the intricacies of precasting, costing and precast set up information
<b>Equipment &amp; Material Manufacturers</b>	To showcase the products to the clientele by displaying their merchandise and systems
<b>Govt., Semi Govt., Private &amp; Autonomous Organisations</b>	To understand the various construction technologies viz., precast composite, monolithic construction etc., and take valuable info from the conference and try to implement in the projects of respective organisations. Meet the Consultants, Manufacturers, Applicators, etc.,
<b>Research Scholars and Students</b>	To know the current trends in Precast Technology, and gain exposure to precast construction, and design
